## The Power of a Big System In a Little Box...

System Main Control Unit

**Packed with robust features** typically found in high-end PBX systems, the **X<sup>eo</sup>** was designed for Abrivo by Iwatsu, a world-renowned Japanese telecommunications manufacturer. Iwatsu manufactures several products for major suppliers such as Panasonic and the Nippon Telegraph and Telephone Company (NTT) to name just a few. You can rest assured that the quality and engineering built into the **X<sup>eo</sup>** will translate into a telephone system you can count on for years to come!

## Xeo APPLICATIONS

**Voice Mail** 4 port, 8 Hour Integrated Voice Mail System.

- 50 Mailbox Users
- Automated Attendant
- Call Record
- Answering Machine Emulation
- Day/Night Message Modes
- Pager/Outdial Notification

**Caller ID Integration** Displays name and number from the telephone company on the display. Calls can then be returned via a call log button.

**Call Notification** When you are busy on a call, anyone in the office can notify you of a second call—in one of several very efficient ways. You can receive a text message on your display, with the capability to respond—or—you can receive a discreet voice notification over your handset.

**Computer Telephony Integration** Use your PC based applications to their fullest extent! The Comlink with ContactPoint software allows you to integrate your contact management software with your Xeo phone system. Now you can make calls from your address book, track and log

calls, and use incoming Screen Pop technology to manage your incoming calls. Works with most major products.

**Wireless Technology** The DCKT970 Wireless Handset provides full multi-line functionality, including a Liquid Crystal Display. The telephone can be used in stand-alone mode or with your existing desktop telephone.

**Standard Features** The Xeo system is packed with standard features including:

- Conference Calling
- Music-On-Hold (External Source Required)
- System Paging
- Personalized Ringing Tones
- Speed Dial (System and Station)
- Toll Restriction
- Automatic Redial
- Group Monitor
- Do-Not-Disturb
